

The chart displays the distribution of treatment types across five categories. The y-axis represents the count of treatments, ranging from 0 to 100,000. The x-axis is labeled 'Treatment'.

The categories on the x-axis are: 100,000, 138, 19,306, 26, and 3,727. Each bar is stacked with various colors representing different treatment types. The colors include black, orange, green, blue, red, purple, brown, and white. The 100,000 category shows a high frequency of black and white treatments, while the other categories show a more diverse mix of colors.
